RAISING OF CHILDREN.

EXPERIENCE has demonstrated the fact, that the giving of the Vermifuge to children frequently will not one cause them to grow, but enjoy better health, especially if punny, whether worms are always discharged or not. When suphate of quinine was first introduced as a medicine, it was only used to care fever, but is now given, and with advantage, many dustage. To some extent this will be the in many discusses. To some extent this will be the case with the Verminge. With my facilities in howiness, I shal be enabled, in future, to put up the article in large bottles, and cheaper, as well as to

Among which will be found family it has been given, sometimes causing a large quantity of worms to be expelled, and at other times few or none. I have marked the fact, that when it was given, children were soon relieved whether worms were aways discharged or not, be-sides becoming more healthy afterwards.

In my neighborhood your Vermifuge has been such used—at one house I found three children sick, two with a high lever and the other had a dark or livid appearance, with difficult breathing and seemed to be at the point of death. Othern all we gave the medicine, and soon all began to discharge worms, in one or two cases enormously, I learned, and were soon well. I saw, by request, at another house, a child two years oil, year, much depressed.
